Research & Articles

Data maps the impact of where a child grows up

Using data from the U.S. Census Bureau and the Internal Revenue Service, the Opportunity Atlas provides insight into how early childhood experiences influence income over a lifetime. The Opportunity Atlas allows users to interactively explore data on children’s outcomes into adulthood for every Census tract in the United States. This can inform local efforts to build equitable, prosperous, and healthier communities.

See where and for whom opportunity has been missing, and learn how this data can help develop local solutions to help more children rise out of poverty.

Systems Approaches for Healthy Communities (SAHC) is a web-based training from the University of Minnesota (UMN) Extension designed to help professionals effectively apply policy, systems and environmental change (PSE) approaches to their work.

Five interactive, self-paced, online modules are the primary source of content with material presented through activities, examples, stories, reflection questions and interactive exercises. Viewed individually or in groups, it is best to complete all five 50-60 minute modules within a flexible 4-6 week period.

Facilitated discussions following the modules is an essential part of the program's success. It helps staff reflect on relevant program content and consider ways to apply strategies to strengthen their PSE work. UMN recommends discussion sessions led by PSE supervisors or team leader within each local agency. Agencies that are not able to facilitate their own discussions can participate in a series of virtual sessions led by the California SNAP-Ed Statewide Training Team.

Rethink Your Drink Day, May 8th

Rethink Your Drink Day is a Statewide Day of Action in California to raise awareness about the health effects of sugary drinks and promote the benefits of drinking water. On the same day, local organizations have the ability to execute this event to promote healthy living across the entire state of California.

The Rethink Your Drink Program’s primary goals are to:
* Educate Californians about healthy drink options,
* Help identify drinks with added sugar, and
* Make the link between consumption of sugar-sweetened drinks and health risks.

In this way, the program hopes to shift consumption toward healthier, more affordable beverages, like water. At the same time, the Rethink Your Drink Program hopes to stimulate community-level partnerships and invite local environmental changes that will improve access, affordability and desirability of healthy beverages. Please check this link for updates: https://rethinkyourdrinkday.com/
